We conclude that the Report provides a fair view of Ausnutria’s sustainability performance in the reporting year. We believe that the environmental and social general disclosures and key performance indicators are fairly represented in the Report, in which Ausnutria’s efforts to pursue sustainable development are widely recognized by its stakeholders.

Our work was carried out by a team of sustainability report assurers. We planned and performed this part of our work to obtain the necessary information and explanations. We considered Ausnutria has provided sufficient evidence that Ausnutria's self-declaration of compliance with the ESG Reporting Guide were fairly stated.

Methodology

Our work was designed to gather evidence on which to base our conclusion. We undertook the following activities:

- A top level review of issues raised by external parties that could be relevant to Ausnutria's policies to provide a check on the appropriateness of statements made in the Report;
- Discussion with senior executives on Ausnutria's approach to stakeholder engagement. We had no direct contact with external stakeholders;
- Interview with staff involved in sustainability management, report preparation and provision of report information;
- Review of key organizational developments;
- Review of supporting evidence for claims made in the Report; and
- An assessment of the Ausnutria's reporting and management processes concerning reporting against the principles of Inclusivity, Materiality, Responsiveness and Impact.
